ADVANCED HEAT EXCHANGERS

ONDA CAN **DEVELOP CUSTOMIZED PRODUCTS ON REQUEST**

Thanks to its flexibility and a lean manufacturing process, Onda S.p.A. can manufacture special products, developed together with the customers. Both thermal and mechanical design

may be carried out according to specific Special finned exchanging tubes, designed and developed by Onda, are available too.

Materials: Titanium, Copper Nickel, Superduplex, Copper, Stainless steel,

Carbon steel Special coating available Pressure: up to 100 bar

Temperature: from -57 °C to 250 °C Overall dimensions: outside diameter up to 2,3m, length up to 13m Weight: up to 25t

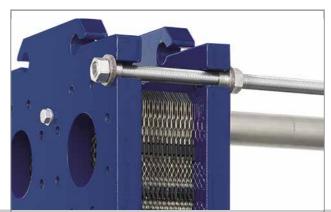

Onda manufactures a complete range of air heat exchangers.

- Air Coolers up to 180 kW
- Unit Coolers up to 180 kW
- Axial Condensers with a capacity between 5 and 2400 kW
- Liquid Coolers & Dry Coolers with capacities from 5 to 1800 kW offering the following options:
- -V- Design
- Up to 20 fans Max. length up to 13 m.

With the wide range of 15 different models of brazed heat exchangers, Onda has the answer for any application, coming both from refrigeration field (evaporation and condensation of freon from 10 to 750 kW) and from HVAC field for heating, sanitary water and air conditioning applications.

The range of gasket plate & frame heat exchangers is available in different models and dimensions. It always offers the best solution for all main heat exchange applications, like HVAC, Industry, Cogeneration, District Cooling & Heating.

in different sizes and for different applications. In addition to the typical evaporators and condensers for HVACR, including the flooded evaporators, Onda has now the technical know-how and the production capacity to build big vessels (with shell diameter up to 2,3 m, and overall length above 10 m) suitable for several industrial and naval installations.

AIR HEAT EXCHANGERS

BRAZED PLATE
